## Announcements

### **Eruv Tavshilin:**

Everyone is reminded to make an Eruv Tavshilin on Wednesday before Yom Tov.

### **Community Service Announcement:**

If you are going to leave on your stove or oven over Yom Tov, then you must ensure that the area is properly ventilated. The constant burning of the gas range and oven, even on a low flame, will over time emit unhealthy levels of carbon monoxide. Turning on an exhaust fan or even opening the kitchen window a bit is enough to prevent a terrible danger. In addition, it is extremely important that you have a properly functioning carbon monoxide detector; they are not expensive and often come together with a smoke alarm.
